# Protect Your Digital Assets

## WITH OUR IPS SOLUTION

An intrusion prevention system (IPS) is an essential appliance that protects company networks from cyber-threats and malicious activity. But there is much more to IPS protection than initial setup and configuration. It requires active management by skilled professionals. The IPS specialists at 85under deal with these systems on a daily basis, and their security expertise can be invaluable to your business.

### Benefits

- Protection
- Analytics
- Awareness
- Resources
- Cisco Powered
- Full Featured
- Multi-vector Threat ID
- Collaborative Security
- Powerful Management
- Adaptive Response

### Protection

Defend your network and data continuously against hacker attacks.

### Analytics

Utilize our real-time threat analysis to counter threats instantly.

### Awareness

Gain deeper insight into the activity on your network.

### Resources

Put our IPS experts to work fending off cyber-threats to your business.

### Cisco Powered

Powered by the largest provider of hardware appliances on the internet today. They track digital danger internationally.

### Full Featured

Stop malicious traffic, including worm and network viruses, before they can affect your network.

### Multi-vector Threat ID

Protects your network from policy violations, vulnerability exploitations, and anomalous activity through detailed inspection of traffic in Layers 2 through 7.

### Collaborative Security

Enhances scalability and resiliency through network collaboration, including efficient traffic capture techniques, load-balancing capabilities, and visibility into encrypted traffic.

### Powerful Management

Our IPS security system identifies, isolates, and recommends precision removal of offending elements, for a network-wide intrusion prevention solution.

### Adaptive Response

Cisco Incident Control System (ICS) prevents new worm and virus outbreaks by enabling the network to rapidly adapt and provide a distributed response.

# About Us

What makes us Unique	
<b>Underground</b>	- Our datacenter is 85 feet underground
<b>Bandwidth</b>	- Gigabit Speed Burstable
<b>Selection</b>	- Custom Server Components - Select Cores, RAM and Storage individually. Buy only what you need
<b>Simplicity</b>	- Microsoft Licensing Month to Month On Demand
<b>Accommodating</b>	- Host your own hardware (or lease dedicated) on the same network as your cloud server (colocation)
<b>Managed</b>	- pulse85 offers a persistent team assigned and dedicated to you (get to know them by name!)

# Enterprise Hardware

Technical Specifications	
Cisco Server Hardware	Cisco Firewall and Intrusion Prevention
IBM Enterprise-class SAN infrastructure	Create Server Template Images
Cisco Datacenter Switching Infrastructure	Microsoft and Linux Operating Systems
Data Center Power - Failover N+1	Add SQL Server 2008 R2 or 2012 DB
Multi Homed Fiber Internet - Burstable to Gbit	Managed Server option with Pulse85
